

# Determine Your Warranty Status

To determine the warranty status of your equipment, locate the Spec Plate. The first four digits of the serial number indicate the year and month the piece of equipment was manufactured (see below).

The diagram shows a rectangular Spec Plate with the Antunes logo and contact information at the top right. Below this is a table with fields for equipment specifications. The 'SERIAL NO.' field is highlighted in yellow and contains the number '12092968'. Below the Spec Plate, the serial number '12092968' is shown in a yellow box. Brackets indicate that the first two digits '12' represent the 'Year Manufactured (ex. 2012)' and the next two digits '09' represent the 'Month Manufactured (ex. September)'.

		180 Kehoe Boulevard Carol Stream, IL 60188 USA 877.392.7854 • 630.784.1000 www.antunes.com	
DESCRIPTION	MFG. NO.	SERIAL NO.	
		12092968	
MODEL NO.	VOLTS	HZ.	WATTS

SERIAL NO.  
12092968

Month Manufactured (ex. September)  
Year Manufactured (ex. 2012)

Based on the serial number of your piece of equipment, you can determine if it is covered under the warranty period.
