#### LIMITED WARRANTY

A.J. Antunes & Co. provides the following limited warranty to the original purchaser of all McDonald's Equipment.

All components are warranted against defects in the material and workmanship for a period of two (2) years. If any part becomes inoperable during the period of this warranty, A.J. Antunes & Co. will pay labor costs to an Authorized Service Agent to replace the part plus travel expenses.

#### WARRANTY EXCLUSIONS

- The cost of installation.
- Equipment that has been damaged due to shipment. Purchaser should make damage claim directly upon carrier.
- Alteration, misuse, abuse.
- Improper storage or handling.
- Improper maintenance.
- Failure to follow proper installation instructions, including electrical connection.
- · Improper or unauthorized repairs.
  - Scheduled Maintenance procedures as outlined in your MRC Card.
- Consumables such as Grill Covers (Release Sheets), gaskets, Conveyor Belt Wraps, O-rings, removal of links, and light bulbs.
- · Freight, foreign, excise, municipal, or other sales or use taxes.
- Consequential damages such as loss of profit, loss of time, the cost of repairing or replacing other property which is damaged, or any other incidental damage of any kind.

A.J. Antunes & Co. reserves the right to make changes in design or add improvements on any products. The right is always reserved to modify Equipment because of factors beyond our control and government regulation. Changes to Equipment do not constitute a warranty charge. This warranty is exclusive and is in lieu of all other warranties, expressed or implied, including any implied warranty of merchantability or fitness for a particular purpose, each of which is expressly disclaimed. The remedies described above are exclusive, and in no event shall A.J. Antunes & Co. or any of its Divisions be liable for special consequential or incidental damages for the breach or delay in the performance of this warranty.

#### This manual is for the exclusive use of licensees and employees of McDonald's Systems, Inc.. © McDonald's Corporation All Rights Reserved

## **OWNER INFORMATION**

#### General

This manual provides the safety, installation, and operating procedures for this unit. Please read this manual prior to installing and operating the unit.

This unit is manufactured from the finest materials available and assembled to Roundup's strict quality standards. This unit has been tested at the factory to ensure dependable trouble-free operation.

#### Service/Technical Assistance

If you experience any problems with the installation or operation of your unit, contact Antunes Technical Service at +1-877-392-7854 (toll free).

#### Warranty Information

Please read the full text of the Limited Warranty in this manual.

If the unit arrives damaged, contact the carrier immediately and file a damage claim with them. Save all packing materials when filing a claim. Freight damage claims are the responsibility of the purchaser and are not covered under warranty.

The warranty does NOT extend to:

- Damages caused in shipment or damage as result of improper use.
- Installation of electrical service.
- · Normal maintenance as outlined in this manual.
- Malfunction resulting from improper maintenance.
- · Damage caused by abuse or careless handling.
- Damage from moisture into electrical components.
- Damage from tampering with, removal of, or changing any preset control or safety device.

Fill in the information below and have it handy when calling Antunes Technical Service for assistance. The serial number is on the specification plate located on the rear of the unit.

Purchased From:				
Date of Purchase:				
Model No.:				
Serial No.:				
Mfg. No.:				
Network ID Number:				

Use only genuine Antunes replacement parts in this unit. Use of replacement parts other than those supplied by the manufacturer will void the warranty.

**IMPORTANT!** Keep these instructions for future reference. If the unit changes ownership, be sure this manual accompanies the equipment.

## SPECIFICATIONS

#### **Electrical Specifications & Plug Configuration**

		<u> </u>	<u> </u>		
Model & Mfg. No	Volt	Watts	Hz.	Plug Description	Plug Configuration
HEBT-3V 9210858	208	3300	50/60	L6-30P 30 Amp., 250 Volt, Straight Twist Lock	
HEBT-3V 9210865	250	3300	50/60	L6-30P 30 Amp., 250 Volt, Straight Twist Lock	

All electrical connections must be in accordance with local electrical codes and any other applicable codes.

## IMPORTANT SAFETY INFORMATION

In addition to the warnings and cautions in this manual, use the following guidelines for safe operation of the unit.

- Read all instructions before using equipment.
- For your safety, the equipment is furnished with a properly grounded cord connector. Do NOT attempt to defeat the grounded connector.
- Install or locate the equipment only for its intended use as described in this manual. Do NOT use corrosive chemicals in and/or on this equipment.
- Do NOT operate this equipment if it has a damaged cord or plug, if it is not working properly, or if it has been damaged or dropped.
- This equipment should be serviced by qualified personnel only. Contact Antunes Technical SErvice for adjustment or repair.
- Do NOT block or cover any openings on the unit.
- Do NOT immerse cord or plug in water.
- · Keep cord away from heated surfaces.
- Do NOT allow cord to hang over edge of table or counter.
- Do NOT clean this appliance with a water jet.

The following warnings and cautions appear throughout this manual and should be carefully observed.

• Turn the unit off, wait for the cool-down procedure to complete its cycle, and disconnect the power cord before performing any service or maintenance on the unit.

#### NOTE: Turning off the power switch does NOT turn off all power to the unit. When the unit is plugged in and turned off, an LED light flashes to indicate that the power cord is plugged in.

- The procedures in this chapter may include the use of chemical products. These chemical products will be highlighted with bold face letters followed by the abbreviated **HCS** (Hazard Communication Standard). See Hazard Communication Standard manual for the appropriated Material Safety Data Sheets (MSDS).
- The equipment should be grounded according to local electrical codes to prevent the possibility of electrical shock. It requires a grounded receptacle with separate electrical lines, protected by fuses or circuit breaker of the proper rating.

• Bread may burn. Therefore toasters must not be used near or below curtains or other combustible walls and materials. Failure to maintain safe operating distances may cause discoloration or combustion.

#### AWARNING A

To avoid possible personal injury and/or damage to the unit, all inspections, tests, and repair of electrical equipment should be performed by QUALIFIED SERVICE PERSONNEL. The unit MUST be <u>completely shut down and unplugged</u> before any internal servicing, except when electrical tests are required. Use extreme care during electrical circuit tests. Live circuits will be exposed.

#### **A**CAUTION **A**

All electrical connections must be in accordance with local electrical codes and any other applicable codes.

#### 

Bread may burn. Therefore toasters must not be used near or below curtains or other combustible walls and materials. Failure to maintain safe operating distances may cause discoloration or combustion.

#### 

NEVER unplug the power cord while the unit is running! Use the proper shutdown procedure before unplugging the power cord.

#### A WARNING

ELECTRICAL SHOCK HAZARD. FAILURE TO FOLLOW THE INSTRUCTIONS IN THIS MANUAL COULD RESULT IN SERIOUS INJURY OR DEATH.

- Electrical ground is required on this appliance.
- Do NOT modify the power supply cord plug. If it does not fit the outlet, have a proper outlet installed by a qualified electrician.
- Do NOT use an extension cord with this appliance.
- The toaster should be grounded according to local electrical codes to prevent the possibility of electrical shock. It requires a grounded receptacle with separate electrical lines, protected by fuses or circuit breaker of the proper rating.
- Check with a qualified electrician if you are unsure if the appliance is properly grounded.

#### INSTALLATION

#### Unpacking

- 1. Open the large box. It contains:
  - HEBT-3V toaster
  - Accessories box
- 2. Remove the accessories box from the large box.
- 3. With the help of another person, carefully remove the HEBT-3V from the large box.
- 4. Remove all protective coverings from the unit.
- 5. Open the Accessories Box. It contains:
  - · Owner's Manual
  - Bun Buffer Frame
- 6. Wipe the entire exterior of the toaster and the accessories mentioned above with a clean towel sprayed with a McDonald's approved sanitizer. Allow to air dry.

NOTE: Handle accessories with care. If an accessory becomes bent or damaged, it may not attach to the unit correctly, which may affect normal operation.

NOTE: If any parts are missing or damaged, contact A.J. Antunes Customer Service IMMEDIATELY at +1-877-392-7854 (toll free).

#### Location

When placing the toaster into service, pay attention to the following guidelines:

- Make sure power is off and the toaster is at room temperature.
- Do NOT block or cover any openings on the unit.
- · Do NOT immerse cord or plug in water.
- · Keep cord away from heated surfaces.
- Do NOT allow cord to hang over edge of table or counter.
- 1. Place the toaster in the required position designated by McDonald's.
- 2. Attach the Bun Feeder, Bun Buffer Frame, and Crown\Heel Separator accessories (Figure 1.)
- Plug the power cord into an appropriate power outlet. Refer to the specification plate for the proper voltage.

Figure 1. HEBT-3V Components

## OPERATION

#### **Operating Instructions**

The HEBT-3V toasts Crowns, Heels, Clubs, and other products. Follow these steps to start the HEBT-3V:

- 1. Turn on the toaster and wait for warm-up to complete.
- Set the Compression Knob to 4 (recommended). If further adjustments are required see page 8 under Adjusting Toast Quality. Refer to the figure on page 7.
- 3. When the unit reaches operating temperature, the control panel displays "Ready".
- 4. Insert product into the designated area of the Bun Feeder Assembly with the cut side of the bun facing towards the front. Toasted product drops into the Bun Buffer.

Figure 2. HEBT-3V Control Panel and Display

#### User Mode

User Mode allows an operator to view the toaster settings but does not permit any adjustments.

- 1. Press and hold the **PROGRAM** button for 5 seconds. After 5 seconds, the display will show the actual temperature of the Rear Platen.
- 2. Press the **LIGHTER** button to toggle between the setpoint and actual temperature of the Rear Platen Heater.
- 3. Press the **PROGRAM** button to proceed to the Front Platen Heater menu. The display shows the actual temperature of the Front Platen.
- 4. Press the **LIGHTER** button to toggle between the setpoint and actual temperature of the Front Platen.
- 5. Press the **PROGRAM** button to proceed to the Motor Menu. The display shows the actual speed of the motor.
- 6. Press the **LIGHTER** button to toggle between the setpoint and actual speed of the Motor.

# NOTE: The unit will exit User Mode after 5 seconds of keypad inactivity.

#### Manager Mode

Manager Mode allows an operator to view and adjust the following settings:

- Platen A Temperature
- Platen B Temperature
- Motor Speed
- Temperature Units (Celsius or Fahrenheit)
- Current Selection: 208 or 240 volts

Manager Mode also allows an operator to view (but not adjust) the Ambient Temperature of the Control Compartment as well as the number of days of operation.

- 1. Turn the unit off.
- 2. Turn the power on while holding the **PROGRAM** button. Hold the button for 5 seconds until the display shows "EnA." Release the button.
- To adjust the Platen Setpoint Temperature, press the LIGHTER or DARKER buttons to reach the desired temperature.

NOTE: The recommended temperature setting for the Rear Platen is 271° C (520° F).

## OPERATION

- 4. Press the **PROGRAM** button to proceed to the Front Heater Setpoint Temperature.
- 5. To adjust the Front Heater Setpoint Temperature, press the **LIGHTER** or **DARKER** buttons to reach the desired temperature.

# NOTE: The recommended temperature setting for the front Platen is 271° C (520° F).

- 6. Press the **PROGRAM** button to procedure to the Motor Speed Setpoint.
- 7. Adjust the Motor Speed Setpoint by pressing the **LIGHTER** or **DARKER** buttons to reach the desired speed.

#### NOTE: The Motor Speed is adjustable from 1-100. The recommended setting is 75. Setting 75 = 17 second pass through. Setting 66 = 22 second pass through.

- 8. Press the **PROGRAM** button to proceed to the Temperature Units.
- To change the Temperatures units from Fahrenheit or Celsius, press the LIGHTER or DARKER buttons.
- 10. Press the **PROGRAM** button to proceed to the Ambient Temperature of the Control Compartment.

#### NOTE: No changes can be made to the Ambient Temperature of the Control Compartment. Temperatures under 150° F (66° C) are acceptable.

11. Press and hold the **PROGRAM** button to save any changes.

NOTE: The unit exits Manager Mode after 30 seconds of keypad inactivity.

There are variations in bun products Worldwide that are used on the A.J Antunes HEBT toaster such as moisture content, bun formulations, age, tolerances etc. The HEBT was designed to compensate for bun variations by allowing user to adjust the compression, light/dark (speed) & temperatures settings in order to achieve a Gold Standard toasted product.

1.LIGHT DARK ADJUSTMENT: Adjust the light dark setting with the ▲ or ▼ buttons. The default light/ dark setting on the HEBT from the factory is 0 but can be adjusted from Lighter 0-10 to Darker 0-10. Light 10 is the lightest setting and dark 10 is the darkest. Each increase in "lighter" value will decrease the pass through time and each increase in "darker" value with increase the pass through time.

#### Safety Features

#### HI-LIMIT CONTROL

A Hi-Limit Control turns off electrical power to the heaters and control circuits if the unit overheats. To reset the control:

- 1. Allow 10 15 minutes for the unit to cool.
- 2. Locate the two Hi-Limit Controls on the rear of the unit. Remove the two black protective caps.
- 3. Press and release both buttons. Reinstall the protective caps.

# NOTE: If the Hi-Limit Controls require continuous resetting, contact your Authorized Service Agency.

#### Purging buns from Toaster

If buns get stuck in the toaster, press and hold both the **UP** and **DOWN** arrow buttons to increase the belt speed until the buns are purged from the toaster.

2.**TEMPERATURE ADJUSTMENT**: Adjust the set point temperature on the platens in the program menu. The default temperature settings on the HEBT are A Platen: 271°C (520°F) and B Platen: 271°C (520° F). The temperatures can be increased to +/- 50°F (10°C) if needed to achieve an acceptable toast quality.

3.**COMPRESSION ADJUSTMENT**: Adjust the compression knob on the left side of the unit. The default compression setting on the HEBT is 4 but is adjustable from 1-7. It is acceptable to adjust the compression from 1-7 as needed to achieve the desired toast quality and bun compression.

## MAINTENANCE

#### **Daily Cleaning**

#### **Clean the Toaster and Belt Wraps**

- 1. Turn the toaster's power switch to the off position. The toaster enters a cool-down mode and will automatically shut down when complete.
- 2. Remove the bun feeder and bun stop with heat-resistant gloves.
- 3. Remove the front and rear conveyor covers with heat resistant gloves.
- 4. Inspect the front belt for any tears, discoloration, or dam-age to the Belt Wrap snaps. Replace any damaged Belt Wrap as needed. With proper maintenance the Crown and Main Belt Wraps can six months or longer. Refer to PR 68 Q1 and PR 68 Q2 for belt replacement instructions.
- 5. If the front belt is in good condition, spray a clean, damp sanitized towel with Sink Detergent solution. Wipe the front belt clean. Rinse the front belt with a separate clean, damp sanitized towel. Allow to air dry.

NOTE: The belt rollers will continue turning while in cool-down mode. This allows you to clean the entire belt. Only clean the belt where it is in front of the Backing Plate to avoid causing dam-age to the belt. Repeat this step several times if there is heavy carbon buildup on the conveyor belt.

- Inspect the rear belts for any tears, discoloration, or damage to the Belt Wrap snaps. Replace any damaged Belt Wrap as needed. With proper maintenance the Crown and Main Belt Wraps can six months or longer. Refer to PR 68 Q1 and PR 68 Q2 for belt replacement instructions.
- If the rear belt is in good condition, spray a clean, damp sanitized towel with Sink Detergent solution. Wipe the rear belt clean. Rinse the rear belt with a separate clean, damp sanitized towel. Allow to air dry.

NOTE: The belt rollers will continue turning while in cool-down mode. This allows you to the entire belt.

NOTE: Only clean the belt where it is in front of the Backing Plate to avoid causing damage to the belt.

- 8. Wash, rinse, and sanitize the bun feeder and bun stop in the three-compartment sink. Allow to air dry.
- 9. Wash, rinse, and sanitize the front and rear conveyor covers in the three-compartment sink.
- 10. Reinstall the clean front and rear conveyor covers.
- 11. Reinstall the clean bun feeder and clean bun stop.
- 12. Clean the outside surfaces of the toaster with clean, damp sanitized towel sprayed with Heavy Duty Degreaser Solution. Rinse with a clean, sanitizer soaked towel and allow to air dry.
- 13. Turn the unit on.
- 14. Place all used towels into the soiled towel bucket.

## **MAINTENANCE** (continued)

Figure 6. Example of Damaged Belt

BELT IS MISSING SNAPS AND IS DAMAGED. REPLACE BELT.

Figure 5. Example of Damaged Belt

#### **MAINTENANCE** (continued)

#### Quarterly

#### **Remove Belt Wraps and Clean Rollers**

- Turn the toaster's power switch to the off position. The toaster enters a cool-down mode and will automatically shut down when complete.
- 2. Unplug the power cord once the cool-down period is complete.

# NOTE: Wait for the cool-down period to complete before unplugging the power cord.

- 3. Remove the bun feeder using heat-resistant gloves.
- 4. Remove the front and rear conveyor covers by lifting up and away from the unit. Set the compression knob to 7.

# NOTE: Reposition the toaster as needed to perform these steps.

- 5. Unlock the lock on the left side panel with a flathead screwdriver and open the panel. Set the bun compression knob to 7.
- 6. Push down on the front and rear belt rollers and move them away from the center of the toaster. Use both hands. This removes tension and locks the rollers in place.
- 7. Lift the upper belt frame lock. Then rotate down so it rests on the camshaft of the rear belt roller.
- 8. Pull down the lower belt frame lock. This provides access to the front and rear belt rollers and belts.
- 9. Carefully remove both of the belts from the toaster.
- 10. Wipe all four rollers and backing plates with a clean, damp sanitized towel. Make sure to remove all debris from the rollers and the backing plates so they are as clean as possible.
- 11. Use a dry cloth towel or nylon-bristled brush to remove all debris from both side compartments, inside of the toaster, and underneath the rollers.

Figure 7. Conveyor Rollers

Figure 8. Conveyor Locks

Figure 9. Belt Wraps

## **MAINTENANCE** (continued)

#### **Install Belt Wraps**

- If you are installing the existing belt wraps, inspect the belts. Replace belt wraps if worn or damaged. If the belt wraps are in good condition put them back on the toaster.
- 2. For new or existing belts, wipe both sides of the belts with a clean, damp sanitized towel. Allow to air dry.
- 3. Slide the belts gently over the appropriate top and bottom roller. Make sure the belt lines up properly on the rollers. The snaps on the belts should face the inside of the roller.
- 4. Lift up the front and rear belt roller. Use both hands. This will add tension and lock them in place.
- 5. Lift the lower conveyor lock to lock the rollers into place.

# NOTE: Lift up on the camshaft of the rear conveyor roller while lifting the conveyor lock.

- 6. Lift the upper belt frame lock and lock in place on the conveyor assembly. Set the compression knob to 4.
- 7. Close the side panel and lock the lock using a flathead screwdriver on the side panel.
- 8. Re-install the front and rear conveyor covers so they lock into place.
- 9. Re-install the bun feeder and bun stop onto the top of the unit.
- 10. Plug in the power cord and turn the unit on.

Figure 10. Conveyor Rollers

Figure 11. Conveyor Locks

#### **MAINTENANCE** (continued)

# Clean Cooling Fans and Electrical Housings (Annually)

- 1. Turn the toaster's power switch to the off position. The toaster enters a cool-down mode and will automatically shut down when complete. Unplug the power cord.
- 2. Remove the bun feeder and set aside.
- 3. Remove the top two screws from the control housing cover and slowly lower the cover.
- 4. Remove any debris or dust from the cooling fan with a small brush. Wipe away any debris with a clean, dry towel Inspect the electrical compartment for crumbs and debris. Clean out all crumbs and debris using a clean, dry towel or nylon bristled brush. Be careful not to disrupt any of the electrical wiring.
- 5. Slowly close the control housing cover. Reconnect with the screws.
- 6. Remove the screws from the bottom plate on the rear of the unit and slowly lower the cover.
- 7. Remove any debris or dust from the cooling fan with a small brush. Wipe away any debris with a clean, dry towel. Inspect the electrical compartment for crumbs and debris. Clean out the crumbs and debris using a clean, dry towel or nylon bristled brush. Be careful not to disrupt any of the electrical wiring.
- 8. Close the bottom plate and re-install the screws.
- 9. Reattach the bun feeder. Plug in the power cord, turn the power on, and test the unit before returning it to service.
