

# TOASTED MUFFINS & BREAKFAST CROISSANTS

**Serve perfectly toasted muffins and croissants for breakfast menu items with the Radiant Toaster with Dual Lanes from Antunes.**

The Radiant Toaster with Dual Lanes, RTDL features two toasting lanes for a high toasting capacity while maximizing valuable counterspace. Designed for quality and consistency, the RTDL uses a smart controller that senses product and automatically adjusts toasting time for the perfect caramelized crispiness - every time, for every volume.

Each toasting lane is independently controlled for maximum flexibility while toasting different products at once. The RTDL's front load and front return allows operators to work quickly and efficiently. With an integrated holding zone, operators can keep up with demand during peak hours.

#### On-demand Results

Toast buns as needed and serve sandwiches fresh without delays.

#### Better Results

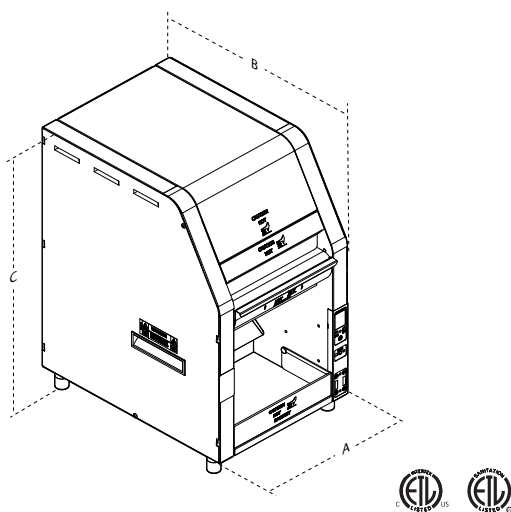

Continuously moving belts allow immediate feeding of buns providing high-quality toasting each time.

#### Fully Customizable

Programmable controls to make adjustments to platen heater temperature and motor speed.

## Radiant Toaster with Dual Lanes | RTDL
