

/// With the VZN series of ultrafiltration systems, operations can deliver high-quality ingredient water to the entire beverage portfolio while also minimizing operating costs compared to other filtration systems.

The VZN series ensures superior water quality through a combination of technologies. Each system features a self-cleaning ultrafilter ahead of a chloramine cartridge, separating mechanical filtration from taste and odor reduction. This separation eliminates premature clogging to ensure the full stated life expectancy of the cartridge, which means less spending on replacement cartridges.

Systems are also available with an additional cartridge that utilizes template assisted crystallization (TAC) technology to protect equipment against lime scale buildup. The VZN series provides operations with premium water at a lower total cost of ownership, ensuring you have an immediate measurable return on investment without compromising on quality.

FEATURES:

- /// .015 micron ultrafilter removes particles 33 times finer than .5 micron filtration, assuring consistent high quality water.
- /// Self-cleaning particle reduction assures low maintenance costs.
- /// Separation of mechanical filtration from taste and odor reduction assures long time between cartridge changes.
- /// Systems with a TAC cartridge reduce lime scale by 96– 98% without using chemicals or wasting water.
- /// Maintains good water minerals that provide benefits to customers' health while also creating high-quality drinks.
- /// Chloramine systems tested and verified by independent laboratory testing to NSF/ANSI Standard 42 for 21,000 gallons chloramine reduction at 5 gpm flow. VZN systems can support a higher instantaneous peak flows as specified on the capacities specification chart; however, rated chloramine reductions will occur at verified specified rates.

VZN-541VC

VZN-521HC-T5

VZN-521HC

Systems tested and certified by NSF International against NSF/ANSI:
Standard No. 42: Aesthetic Effects
Nominal Particulate Reduction Class 1.
Standard No. 53: Health Effects
Cyst Reduction
Turbidity Reduction
as verified and substantiated by test data.

/// Ultrafiltration System Chloramine Reduction | VZN

VZN systems assure the highest quality ingredient water at the lowest cost of ownership for premium water filtration. They combine technologies into one system to deliver better-tasting, ultrafiltered water. Our complete line of water filtration products ensure we have the system to meet your specific needs.

Specifications

- /// Maximum Operating Pressure: 100 psig (690 kPa)
- /// Maximum Operating Temperature: 104°F (40°C)
- /// Nominal Pore Size: .015 microns
- /// pH Range: 6.5 to 8.5
- /// MWCO: 100 to 150 kD
- /// Volts: 100 to 240
- /// Watts: 10
- /// Amps: .08
- /// Hertz: 50/60
- /// Includes plug adapters for US, Europe, Australia & UK
