

Clamshell Grill | CG

NEXT GENERATION GRILLING

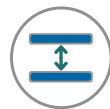

The Antunes Clamshell Grill utilizes upper and lower grill surfaces to cook products efficiently.

When a cook cycle is activated on the user interface, the upper grill surface automatically lowers down onto the product to cook quickly and evenly. The upper grill surface then raises up automatically when the cook cycle is completed. Three separately controlled cook zones provide menu flexibility to cook a variety of food products at different temperatures on the same unit.

Fully Programmable

Intuitive, easy to use touch screen display

High Precision Gap Control

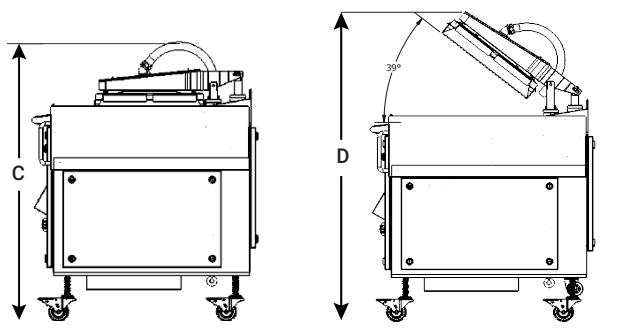

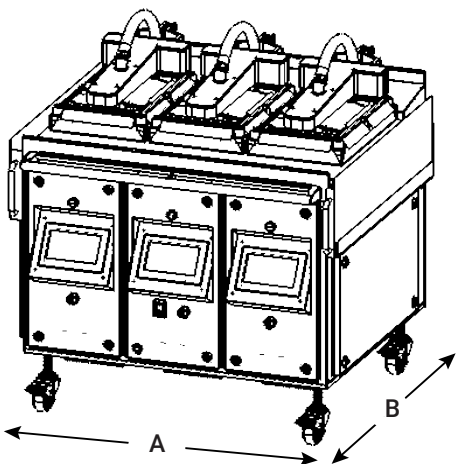

Even cooking precision, ensuring every dish is cooked to perfection

Menu update made easy

Make menu changes remotely

Clamshell Grill | CG

Features:

- Fully Programmable, touch screen controls for ease of use
 - IPS Display has improved color accuracy compared to traditional displays and no color or image fading when viewed from an angle up to 85°
- Advanced, programmable controls allows multi-stage cooking that ensures correct temperate, cook time, & gap for AM/PM recipes
- 3 Independently controlled cook zones allow different temperature and gap settings for each lane
 - Lane cook surface: 17.5" x 11.5"
 - Total cook surface: 17.5" x 35.5"
- Upper platen raises and lowers automatically onto product to a precise gap, adjustable in 1mm increments
- Smart controller optimizes power usage for energy efficient operations
- Automatic leveling ensures consistent gap for each recipe
- Uniform temperature across the platen provides **Gold Standard Food Quality**
- Bluetooth, wired Ethernet and Wi-Fi enabled
- Enhanced, on-board self-test diagnostics
