Overview

This unit is intended to be used for commercial applications, for example: in kitchens of restaurants, canteens, hospitals and in commercial enterprises such as bakeries, butcheries, etc., But not for continuous mass production of food.

Before Use

This manual contains safety, installation, and operating procedures for the unit. Read and understand it completely before installing or operating the unit. Keep this document for reference. If the unit changes ownership, this manual must accompany it.

In Case of Damage

If the unit arrives damaged, file a claim with the carrier immediately. Save all packing materials when filing a claim. Freight damage claims are the responsibility of the purchaser and are not covered under warranty.

Safety Information

Installation

- Read and understand all instructions before installing or using the unit.
- Install this unit to comply with the basic plumbing code of the Building Officials and Code Administrators, Inc. (BOCA) and the Food Service Sanitation Manual of the Food and Drug Administration (FDA).
- Install and locate the equipment only for its intended use as described in this manual.

WARNING

ELECTRICAL SHOCK HAZARD.
Failure to follow the instructions in this manual could result in serious injury or death.

Do not modify the power supply cord plug. If it does not fit the outlet, have a proper outlet installed by a qualified electrician.

Electrical ground is required on this appliance.

Check with a qualified electrician if you are unsure if the appliance is properly grounded.

Do NOT use an extension cord with this product.

The unit should be grounded according to local electrical codes to prevent the possibility of electrical shock. It requires a grounded receptacle with separate electrical lines, protected by fuses or circuit breaker of the proper rating.

NEVER unplug the power cord while the unit is running. Use the proper shutdown procedure before unplugging the power cord.

Operation

- The unit is furnished with a properly grounded cord connector. Do not attempt to defeat the grounded connector.
- Do not operate the unit if it has been damaged or dropped, if it has a damaged cord or plug, or if it is not working properly.
- Do not block or cover any openings on the equipment.
- Do not immerse the cord, unit, or plug in water.
- Keep the cord away from heated surfaces.
- Do not allow the cord to hang over the edge of a table or counter.
- This appliance is not to be used by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge unless they have been given supervision or instruction.
- Children being supervised are not to play with the appliance.
- Bread may burn. Therefore toasters must not be used near or below curtains or other combustible walls and materials. Failure to maintain safe operating distances may cause discoloration or combustion.

Maintenance

- Do not use abrasive materials; they can damage the unit's stainless steel finish.
- Do not use corrosive chemicals in this equipment.
- Chlorides or phosphates in cleaning agents (e.g., bleach, sanitizers, degreasers, and detergents) can permanently damage stainless steel equipment. The damage is usually in the form of discoloration, dulling of the metal surface finish, pits, voids, holes, or cracks. This damage is permanent and is not covered by warranty.
- Always use a soft, damp cloth for cleaning. Rinse with clear water and wipe dry. When required, always rub in the direction of metal polish lines.
- Routine cleaning should be performed daily with soap and water.
- Rub off finger marks and smears using soap and water.
- Do not clean unit or components in a dishwasher unless specifically specified in the cleaning instructions.
- Do not clean the unit with a water jet or steam cleaner.

Service

- Inspection, testing, and repair of electrical equipment must be performed only by qualified service personnel.
- To avoid possible personal injury and/or damage to the unit, all inspections, tests, and repair of electrical equipment should be performed by qualified personnel ONLY. Contact Antunes Technical Service for adjustment or repair.
- Turn the power off, unplug the power cord, and allow unit to cool to room temperature before performing any service or maintenance.
- If the supply cord is damaged, it must be replaced by the manufacturer, its service agent, or a similarly qualified person in order to avoid an electrical hazard.
- Cleaning and user maintenance shall not be made by children without supervision.

Electrical Ratings

Model	Volts	Watts	Amps	Hertz	Plug Description
9211051 RT-2H	208~	5000	24	50/60	L6-30P, 30 Amp., 250 Volt Straight Twist Lock

Installation

NOTE: When placing the toaster into service, make sure to provide at least 3 inches of space on all sides of the unit.

1. Remove unit and all packing materials from shipping carton.

NOTE: If any parts are missing or damaged, contact Antunes Technical Service IMMEDIATELY at 1-877-392-7854 or 1-630-784-1000.

2. Remove all packing materials and protective coverings from the unit.
3. Remove all accessories Wash these items at the 3 compartment sink and set aside to air dry
4. Wipe all surfaces of the unit with a hot damp cloth.

NOTE: Do NOT use a dripping wet cloth. Wring out before use.

5. Re-install the Crumb Tray and Bun Chute.

When placing the unit into service, pay attention to the following guidelines:

- Make sure the unit is at room temperature before plugging in the power cord.
- Do not block or cover any openings on the unit.
- Do not immerse the power cord or plug in water.
- Keep the power cord away from heated surfaces.
- Do not allow the power cord to hang over edge of table or counter.
- Allow 3-4" of clearance around the toaster for ventilation.

Figure 1. Components

Figure 2. Control Panel

Operating Instructions

NOTE: To ensure proper operation, toast some test product at the start of each day.

OFF is displayed on the screen when the unit is plugged in and powered off.

1. On the front of the toaster, press the power button to turn the toaster on. The unit will make a clicking sound. This is normal.
2. The unit displays the software version and starts to warm up (approximately 20 minutes)
3. The unit displays the "READY" message when it reaches proper operating temperature.

Toasting Product

1. Facing the front of the unit, insert product as described.

Insert Breads and Muffins in the Feeder with the cut side up.

Refer to Figure 3.

Shutting down the Toaster

Follow these steps to shut down the toaster:

1. Press and hold the Power button.
2. The unit enters cool down mode and displays **Cool Down Time**. The fans continue to run. The unit shuts down completely when this cool down mode completes.

Figure 3. Toasting Product

Hi-Limit Reset Button

A hi-limit control (rear of unit) turns off power to the unit if it overheats. To reset this Hi-Limit control, allow sufficient time (10-15 minutes) for the unit to cool down, then remove the Hi-Limit control cap and press the reset button located on the rear of the unit. If the unit requires continuous resetting, call for service.

Error Messages

If the toaster encounters an operating error, the unit displays FAULT and beeps. When this happens:

1. The error code will display on the screen. Write down the error code and refer to the Troubleshooting section of this manual.

Menu Options

Edit Product Settings

1. Press the Gear Icon
2. Enter password (12345).
3. Select Edit Product button (Defaults: Breakfast & Lunch).

4. Enter Toast Time (in seconds).

Adding Products

1. Press the Gear Icon.
2. Enter Password (12345).
3. Select "Products".
4. If entering a new product, select from the Empty Boxes.
5. Enter Product Name.
6. Enter Toast Time (in seconds).
7. Press the check mark to complete.
8. Select "Home" to return to the Home screen.

Edit Settings

1. Press the Gear Icon.
2. Select Edit Settings.
3. Enter Password (12345).

4. To increase heat, select Top IR SP (displayed in percentage).
5. Select Ready Temp to change temperature from Warmup to Ready.
6. Select Temp Units to change between Fahrenheit to Celsius.

Factory Reset

To reset the unit to original factory setting, follow these steps:

1. From the Home screen, press the Gear Icon.
2. Enter the password provided by Antunes.
3. Select Factory Defaults.
4. Select Reset All. This resets the System Settings, Menu, Clears Errors, and Clears Elapsed.
5. Press the check to save changes. Operation Complete will display on the screen.

6. Press check again to restore default settings.
7. Press Home screen to return to the home menu.

Maintenance

**WARNING**

The unit will remain hot while it is cooling down. Personal injury and burns may result from touching the unit before it is finished cooling down. Wear Heat Resistant Gloves.

Cleaning the Accessories and Toaster

1. Turn the toaster off. The fans and conveyors continue to run. The cleaning mode continues for 20 minutes and shuts the unit down automatically when complete.
2. Remove Crumb Tray and set aside.
3. Wash the Crumb Tray in soap and water. Rinse with clean water and allow to air dry.
4. Wipe all surfaces of the unit with a hot damp cloth.

NOTE: Do not use a dripping wet cloth. Wring out before use.

5. Wipe the bun landing area and Skirt with a hot damp cloth (Figure 1).

Quarterly Maintenance

Perform the steps in the **Daily Maintenance** section of this manual.

Inspect Conveyor Belt Chain

Inspect the Conveyor Belt Chain to ensure it is in good condition and is free of damage.

Check the tension on the Conveyor Belt Chain. If the belt is sagging significantly or is dragging on the Crumb Tray Reflector, remove one or two links from the chain. Refer to the section titled **Adding/Removing Conveyor Belt Chain Links** for instructions.

Measuring Conveyor Belt Chain

1. Turn the toaster off. The unit enters a 20 minute cool down mode and displays OK to Clean when complete. The fans and conveyors continue to run. The cleaning mode continues for 20 minutes and shuts the unit down automatically when complete.
2. Remove the Crumb Tray.
3. See the image below. Facing the front of the toaster, locate the front Idler Shaft. The Idler Shaft should be in the middle of the oval cut out.

If the shaft is towards the front, remove a link.

If the shaft is towards the back, add a link.

If the shaft is in the middle, no action is needed.

If you need to add or remove a link, refer to the section titled **Adding/Removing Conveyor Belt Chain Links** in this manual.

Conveyor Belt Chain Maintenance

Links from the Conveyor Belt Chain can be removed or added to keep the Conveyor Belt Chain at the right tension.

1. Turn the toaster off. Unplug the power cord, and allow the unit to cool.
2. Put on heat resistant gloves and remove the Crumb Tray.
3. Push the front of the Conveyor Shaft in and down so it locks into place. This removes tension from the Conveyor Belt Chain. Make sure both sides are locked in the in and down position.
4. Remove or add links as required. See figure 4.
5. Lift the front of the Conveyor up and out to restore tension to the Conveyor Belt Chain.
6. Re-install the Crumb Tray.
7. Plug in the power cord and turn the unit on.

Replacing the Conveyor Belt Chain.

Before you replace the Conveyor Belt Chain, make a note of how the existing chain is installed. The replacement chain must be installed in the same manner.

NOTE: The chain **MUST** be installed with the hooks facing the direction of travel.

1. Turn the toaster off, unplug the power cord and allow the unit to cool.
2. Put on heat resistant gloves and remove the Crumb Tray.
3. Push the front of the Conveyor Shaft in and down so it locks into place. This removes tension from the Conveyor Belt Chain. Make sure both sides are locked in the IN and DOWN position.
4. Disengage the conveyor belt chain from both sides (Figure 4).
5. Remove the Conveyor Belt Chain and discard.
6. Refer to Figure 4 and install the new Conveyor Belt Chain around the sprockets.
7. Install the new Conveyor Belt Chain. The chain **MUST** be installed with the hooks facing the direction of travel.
8. Lift the front of the Conveyor up and out to restore tension to the Conveyor Belt Chain.
9. Re-install the Crumb Tray.
10. Plug in the power cord and turn the unit on.

Figure 4. Disconnecting Conveyor Chain

Troubleshooting

Problem	Possible Cause	Corrective Action
No Control Display	Power cord not plugged in	Plug power cord into the proper electrical outlet
	Hi-Limit has tripped	Allow unit to cool and reset the Hi-Limit Control. If it trips again, contact your Maintenance person or Antunes Technical Support at +1-877-392-7854 (toll free) for assistance.
	Circuit breakers turned off or tripped. Damaged electrical outlet, plug, or cord. Power switch damaged	Reset circuit breakers. If they trip again, check the power cord, plug, and outlet for damage. Contact your Maintenance person or Antunes Technical Support at +1-877-392-7854 (toll free) for assistance.
	Faulty or misaligned communication cable	Replace or align communication cable
	Faulty Transformer	Replace transformer.
Conveyor does not turn on	Conveyor Belt/Chain has stretched. Chain skipping on sprockets.	Measure and adjust the conveyor belt chains as described in the Maintenance section of this manual.
	Loose sprocket	Verify setscrew is tight on flat part of shaft.
	Motor Drive Chain came off sprocket(s)	Reinstall drive chain.
	Internal part /object interfering within conveyor system	Check for interference & clear up as necessary.
	Drive chains need lubrication.	Lubricate chain.
Conveyor(s) hesitate	Loose or misaligned sprocket	Align and tighten set screw on sprocket
	Motor drive chain loose or stretched	Replace or tighten up slack on drive chain.
	Drive motor(s) have failed	Contact your Maintenance person or Antunes Technical Support at +1-877-392-7854 (toll free) for assistance.
Product must be forced into the toaster. Buns sticking and burning.	Conveyor Belt/Chains are skipping on sprockets.	Adjust the conveyor belt chains as described in the Maintenance section of this manual.
	Drive motor stalls intermittently.	Contact your Maintenance person or Antunes Technical Support at +1-877-392-7854 (toll free) for assistance.
Toaster making unusual sounds	Conveyor belt chains have stretched or adjusted incorrectly.	Adjust the conveyor belt chains as described in the Maintenance section of this manual.
	Motor Drive chain needs lubrication.	Lubricate chain
	Conveyor shaft bearing is binding.	Contact your Maintenance person or Antunes Technical Support at +1-877-392-7854 (toll free) for assistance.
Fan is making an unusual sounds	Failed cooling Fan	Verify vents on toaster are unblocked and not near other heating appliances. Clean Fan. If error persists contact your maintenance person or Authorized Service Agency for service.
	Cooling Fan dirty	
Display reads HI-LIM	Hi-Limit has tripped.	Allow sufficient time (10-15 minutes) for the unit to cool down. Remove the Hi-Limit control cap at the rear of the unit. Press the Hi-Limit Reset button. Turn the unit on and test the unit by toasting some test product. If the Hi-Limit continues to trip, Contact Antunes Technical Support at +1-877-392-7854 (toll free) for assistance.

Troubleshooting Continued

Problem	Possible Cause	Corrective Action
Display reads M1LOAD	A mechanical obstruction has occurred that is slowing down the conveyor motor.	Check the bottom wire conveyor and surrounding areas for any obstructions/jams. Contact Antunes Technical Service at +1-877-392-7854.
Display reads M2LOAD	Wire Conveyor Belt is too loose/sagging & getting jammed.	If sagging is noticeable, remove the necessary links to shorten the Wire Conveyor Belt. Refer to the Maintenance section in this manual. Contact Antunes Technical Service at +1-877-392-7854.
	Wire Conveyor Belt is broken/damaged and jammed.	Replace the wire belt according to the Maintenance section of this manual. Contact Antunes Technical Service at +1-877-392-7854.
Display Reads TOPTMP	Toaster electrical compartment is overheating due to the lack of airflow surrounding the toaster.	Inspect the cooling at the top and at the bottom (back of unit) and ensure it is clean according to the fan cleaning portion of the Maintenance section of this manual. Make sure the unit has enough space on both sides and the rear of the unit according to the Installation section of this manual. If the condition continues, contact Antunes Technical Service at +1-877-392-7854.

Limited Warranty

Equipment manufactured by Antunes has been constructed of the finest materials available and manufactured to high quality standards. These units are warranted to be free from electrical and mechanical defects for a period of two (2) years from date of purchase under normal use and service, and when installed in accordance with manufacturer's recommendations. To insure continued operation of the units, follow the maintenance procedures outlined in the Owner's Manual. During the first 12 months, electromechanical parts, non-overtime labor, and travel expenses up to 2 hours (100 miles/160 km), round trip from the nearest Authorized Service Center are covered. During the second year of this warranty (months 12 - 24), the following items are covered by a Part Only warranty: Drive Motor, Motor Board, Current Sense Board, Display Board, and Main Board.

1. This warranty does not cover cost of installation, defects caused by improper storage or handling prior to placing of the Equipment. This warranty does not cover overtime charges or work done by unauthorized service agencies or personnel. This warranty does not cover normal maintenance, calibration, or regular adjustments as specified in operating and maintenance instructions of this manual, and/or labor involved in moving adjacent objects to gain access to the equipment. This warranty does not cover consumable/wear items such as Release Sheets, Conveyor Belt Chain Link removal, Belt Wraps, and Dampers. This warranty does not cover damage to the Platen due to operating the toaster without a Release Sheet or cleaning with abrasive cleansers or tools, misuse or dropping of unit. This warranty does not cover problems or failures resulting from improper/incorrect voltage supply. This warranty does not cover Travel Time & Mileage in excess of 2 hours (100 miles/160 km) round trip from the nearest authorized service agency.
2. Antunes reserves the right to make changes in design or add any improvements on any product. The right is always reserved to modify equipment because of factors beyond our control and government regulations. Changes to update equipment do not constitute a warranty charge.
3. If shipment is damaged in transit, the purchaser should make a claim directly upon the carrier. Careful inspection should be made of the shipment as soon as it arrives and visible damage should be noted upon the carrier's receipt. Damage should be reported to the carrier. This damage is not covered under this warranty.
4. Warranty charges do not include freight or foreign, excise, municipal or other sales or use taxes. All such freight and taxes are the responsibility of the purchaser.
5. This warranty is exclusive and is in lieu of all other warranties, expressed or implied, including any implied warranty or merchantability or fitness for a particular purpose, each of which is hereby expressly disclaimed. The remedies described above are exclusive and in no event shall roundup be liable for special consequential or incidental damages for the breach or delay in performance of this warranty.
