

ANTUNES INFINISTEAM MULTI-DRAWER STEAMER

The Antunes InfiSteam Multi-Drawer Steamer is the industry's premier solution for steaming, providing next-generation boiler technology and next-level steaming performance.

To better serve operators, the InfiSteam features:

Faster retherm times

Safe food holding with programmable times and temperatures

Prepare smaller food portions as needed, leading to less food waste

High-performance steaming that enhances food appearance, taste, and texture

The ability to control and utilize each drawer individually

An easy-to-use, color touchscreen interface for simple recipe entry and recall

These critical features add up to a solution that provides cutting-edge control for precision, on-demand steaming, letting operations run with peak speed, efficiency, and quality.

The InfiSteam is always ready, providing continuous steaming with zero recovery delay and accelerated cook times with a single touch.

Fresher food, better taste, and quicker prep – the InfiSteam delivers it all.
